

ViCALity® Medium

USP / FCC Precipitated Calcium Carbonate

ViCALity® PCC Products:

ViCALity® Medium Precipitated Calcium Carbonate (PCC) is one of the a family of low lead calcium carbonates available a wide variety of sizes and shapes to meet the needs of formulators of foods, drugs, nutritionals and personal care products. Containing less than 500 ppb lead, the ViCALity® PCCs are suitable for many applications that must meet the lead requirements of California Proposition 65.

ViCALity® PCCs meets and exceeds the requirements for Calcium Carbonate for the current United States Pharmacopeia and the Food Chemicals Codex, Seventh Edition. All are certified as Kosher Calcium carbonate is Affirmed GRAS (Generally Recognized As Safe) by the US FDA (21 CFR 184.1191) with no limitations other than good manufacturing practices. This allows the use of calcium carbonate as both a direct and indirect food additive. ViCALity® PCC products are manufactured in the Specialty Minerals plant in Adams, MA under stringent quality assurance procedures and good manufacturing practices.

ViCALity® Medium PCC:

ViCALity® Medium PCC is the largest of the three open structured scalenohedral calcites which were developed to yield a range of low powder densifies. ViCALity® Medium PCC is a 2.6 micron particle, with high surface area and oil absorption.

There is no exact ultra-low lead equivalent of ViCALity® Medium PCC; CalEssence® 160 PCC provides the closest match.

Characteristics:

- Low density
- High oil absorption
- High surface area
- Excellent dispersibility
- Builds viscosity in liquids and pastes
- Less than 500 ppb lead
 - Good for most Proposition 65 uses
- High elemental calcium level
 - ~40% calcium
- High bioavailability – equal to milk calcium
- Economical in use
- No calories, carbohydrates or fats
- Non-dairy, lactose-free

Scanning Electron Micrograph:

Applications:

Because of the open structure and high surface area of the three scalenohedral ViCALity® PCC products, they are excellent where there are needs for absorbing liquids and oils, producing thick masses or high viscosity liquids, and for low density powders. The high surface area helps maximize reaction rates and uniformity when used as a raw material synthesis.

Some uses ViCALity® Medium PCC are:

- Viscous personal care cream and lotion products
- Powdered beverage mixes
 - Soy, milk, chocolate, sport
- Snack foods
- Clear beverages, when pre-reacted with food acid
- Flavor absorbent or carrier

Typical Physical Properties

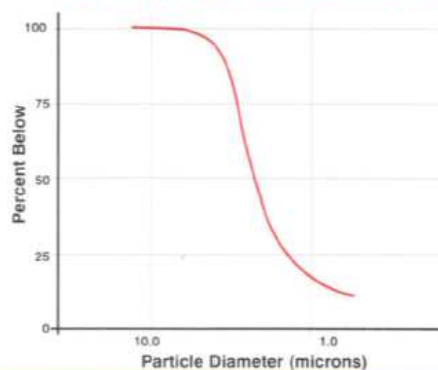

Crystal habit	Calcite
Particle Shape	Scalenohedral
Particle Size, median, microns	2.6
mode, microns	2.7
Surface Area, meters ² /gram	6.9
Oil Absorption, grams oil/100 grams	56
Tapped Density, grams/cc	0.55
pounds/ft ³	34.3
Bulk Density, grams/cc	0.27
pounds/ft ³	16.9
Specific Gravity	2.71
pH	9.8
Moisture, %	0.2
Dry Brightness Hunter Y, Rd value	.97
Lead, parts per billion	< 500
Solubility, in water, pH 7	Insoluble
in acid	Soluble

Note:

These are typical values, and should not be used to set specifications.

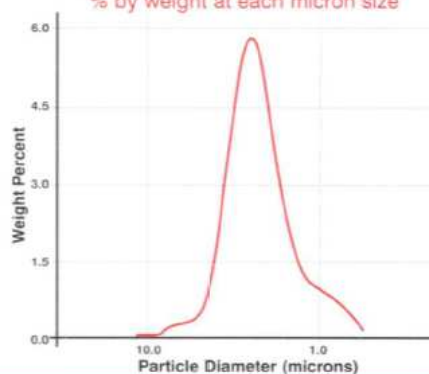

Cumulative Particle Size Distribution

Total % by weight below each micron size

Particle Size Distribution

% by weight at each micron size

Dispersion and Slurry Viscosity:

High shear should be applied to a high solids suspension in order to achieve the smallest particle size in a dispersion.

After high shear dispersion for 10 minutes, the Brookfield RVT viscosity of a slurry in water, measured at 20 rpm, is:

- 30% solids250 cps
- 40% solids1,200 cps
- 50% solids6,000 cps

If problems are encountered in preparing high solids slurries, an appropriate pigment dispersant should be used.

Product Code: 100-04803-3

Packaging:

ViCALity[®] Medium PCC is packaged in 50 pound, three-ply kraft bags. The standard shipping unit is a 54" x 42" 2-way pallet of 50 bags, a total of 2,500 pounds. Pallets include slipsheet and shrinkwrap. Semi-bulk packaging, typically in 2,000 pound sacks, is also available. Contact customer service or your SMI Representative for details.

FDA Codes:

The Specialty Minerals plant in Adams, MA is registered with the US FDA as a Drug Establishment. The registration number for the plant is 1214544. The National Drug Code (NDC) for ViCALity[®] Medium PCC is 053004-0480-3 for product supplied in 50 pound bags
