

PIPELINE FLUID TREATMENT

EXPERT SERVICE, RIGHT DOWN THE LINE

At CETCO, we offer a comprehensive range of smart and environmentally friendly pipeline fluid management services to meet the unique needs of our pipeline industry customers. Our qualified experts have the skills and experience to provide all stages of fluid handling from pumping, circulation, flooding, and testing to fluid capture with pressurized retention as well as multiple stage separation of flowing fluids or products. For us, offering these services means more than wide-ranging knowledge, rapid service and exceptional solutions. It means protecting our natural environment for generations to come by working safely, every day.

APPLICATIONS

- Stand-Alone Separation and Filtration for Gas and Liquid
- Water Treatment Services for Discharge
- Terminals and Tank Farm Cleanup
- Pipeline Commissioning, Decommissioning and Abandonment
- Fluid Handling
 - Flushing/Circulation/Capture/Filtration
- Pipeline Equipment Rentals
- Project Management

FEATURES & BENEFITS

- Value added results & SMART recommendations to yield ROI
- Unbiased data for effective problem remediation
- Extensive produced water field experience
- Capability to quickly test technologies to mitigate technology risk
- Taking co-ownership of the problem and its solutions until final resolution
- Largest global rental fleet of produced water treatment equipment for short/long term remedial solution
- Capability of providing full new produced water treatment packages to reduce engineering expenditure

IN-HOUSE SERVICES AVAILABLE ON CETCO PROJECTS

CETCO provides additional in-house Engineering, Project Management, Research and Development services for all CETCO Customer Projects.

ENGINEERING & PROJECT MANAGEMENT

CETCO experts, professionally certified (P.E.) and certified (PMP), deliver tailored engineering services, technical expertise, and project management for CETCO projects to enhance project performance.

ENGINEERED TO EXCEL
