

## PERFORMANCE MINERALS FOR SPECIALTY APPLICATIONS

# Thixo-Carb® 300

## precipitated calcium carbonate (pcc)

Thixo-Carb® 300 precipitated calcium carbonate (pcc) is a surface treated, ultrafine pcc providing controlled particle size and narrow distribution designed specifically for application in polyurethanes, polysulfides, pvc plastisols, epoxy and butyl systems.

Thixo-Carb® 300 pcc is a functional additive providing thixotropy and viscosity control resulting in improved sag and slum characteristics. Physical properties are improved due to the semi-reinforcing performance of Thixo-Carb® 300 pcc providing the formulator opportunities for cost effective development of high performance sealant systems.
