## WELL INTERVENTION & FLOWBACK APPLICATIONS

### BETTER LONG-TERM WELL PERFORMANCE

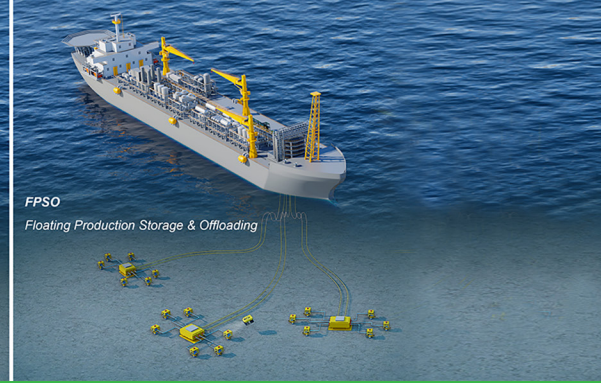

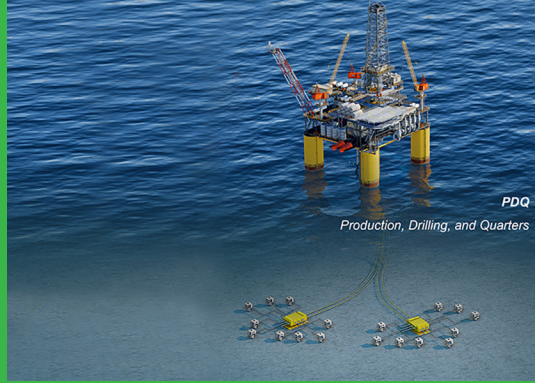

At CETCO, we offer an array of unique, customized services to deliver better long-term well performance. Around the world, our experienced operations and design teams construct and install temporary services for a wide range of oil & gas applications, utilizing our diverse equipment fleet on projects that extend from engineering, procurement, and commissioning, through production to decommissioning. To monitor, measure and process your well fluids, we offer Well Testing Services performed by our experienced operations and design team who specialize in Well Flow Management. Through our proven expertise and capabilities that span the full life of the well – from exploration to abandonment - we reduce operating costs, increase production, and extend asset life for our customers while achieving industry-leading safety, quality, and environmental compliance.

### APPLICATIONS

- Upstream
  - Engineering and Design
- Midstream
  - Well Clean Up
  - Flow Backs
  - Solids Management
  - Fluid transfer to Barge, Boat or Tanker
  - Sealant (Leak Repair)
- Downstream
  - Reporting

### FEATURES & BENEFITS

- Our Surface Well Test Package provides safe and efficient system to separate hydrocarbon phases, to measure and collect accurate well data
- Wireless data monitoring of pressures, temperatures and flow rates recorded at multiple locations
- Reliable, well maintained equipment that meets industry standards
- Trained and competent personnel to ensure all data collected is correct
- Modular design packages for ease of transport
- High Capacity Liquid and Gas Separators all with inline meters
- Accurate Liquid and Gas measurement through advanced technology meters
- In House Engineering for all drawings and process calculations
- CETCO Sealant Solutions, unique leak repair for both large and small leaks

## IN-HOUSE SERVICES AVAILABLE ON CETCO PROJECTS

CETCO provides additional in-house Engineering, Project Management, Research and Development services for all CETCO Customer Projects.

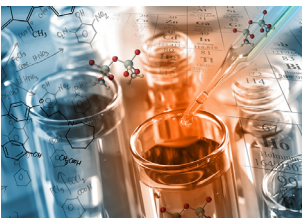

### ENGINEERING & PROJECT MANAGEMENT

CETCO experts, professionally certified (P.E.) and certified (PMP), deliver tailored engineering services, technical expertise, and project management for CETCO projects to enhance project performance.

#### ENGINEERED TO EXCEL

### RESEARCH & DEVELOPMENT

CETCO scientists conduct research and development to create innovative technologies to assist customers worldwide. We aim to maximize efficiency, minimize costs, and enhance sustainability. We offer Applied Analytical and Testing services at our state-of-the art Houston and Regional ancillary labs.

#### LEADING THROUGH INNOVATION
