Position: Steel Mill Service Technician  
Location: Columbus, MS

Minerals Technologies Inc. (MTI) is a resource- and technology-based company that develops, produces and markets worldwide a broad range of specialty mineral, mineral-based and synthetic mineral products and related systems and services. The Company has four reportable segments: Specialty Minerals, Performance Materials, Refractories and Energy Services.

The Minteq International Inc. division is the premier supplier of engineered refractory lining systems, metallurgical wire products, bulk calcium and calcium alloy products, refractory measurement systems, and advanced carbon products.

MTI provides a business environment and promotes a culture that encourages all employees to contribute to our success. We have long been committed to the recruitment and advancement of the most talented and qualified people. We recognize that MTI’s ability to provide the highest caliber of products and services is enhanced by a workforce that reflects the diversity of the communities and countries in which we work.

We currently have an exciting opportunity for a Steel Mill Service Technician at our Steel Dynamics location in Columbus, MS. The Steel Mill Service Technician will operate and maintain all necessary equipment in a Steel Mill Service location that has both wire and refractories related operations and equipment. In doing so, the SMS Technician ensures the most efficient & effective application of Minteq products, and delivery of services to the customer.

The SMS Technician position is a continuum beginning at SMS Technician 1 and progressing through SMS Technician 4 as skills are gained. Level is determined through the use and completion of training checklists. Employees may be assigned to perform any task for which they have been qualified. Employees may also be assigned to positions for which they are working to become qualified as a portion of the training process.
