

Produced Water Technology

Process Equipment for Produced Water & Water Treatment System

CETCO
ENERGY SERVICES

A Minerals Technologies Company

CLEAR SOLUTIONS
for complex fluids

CETCO's Produced Water Treatment Systems stand for performance, value and quality. We design, engineer and manufacture essential separation technologies for the removal of oil and solids from water produced globally by the oil and gas industry. Our systems are capable of handling every project necessary for separating or treating gas, oil or water from a production stream and eliminate the frustrations associated with poor performance, size, and cost.

ABOUT US

CETCO ENERGY SERVICES (CETCO), the trusted partner and complex fluid experts equipped and ready to solve your fluid challenges; delivering clear and proven results by increasing operator efficiency, reducing downtime, and maximizing output while safely protecting the environment.

OUR EXPERTISE

- ✓ Advanced Technology
- ✓ Safety Performance
- ✓ Globally Innovative
- ✓ Environmentally Conscious

Produced Water Technology

Process Equipment for Produced Water & Water Treatment System

Platforms today are being used past their design life. As a result, water cut increases beyond the design of many process facilities. This “Brownfield” re-development of the water processing facilities allows existing facilities to handle increased amounts of produced water. At CETCO, we are uniquely positioned to provide the temporary facilities to address these issues. While the temporary facility is in place, we can build custom permanent equipment for that specific platform to fit within the existing facilities. Our highly efficient CrudeSep® compact flotation unit and our Hi-Flow® coalescing system are ideal for these installations.

Features & Benefits

- Custom-built equipment
- Unparalleled removal efficiency
- Maintenance – free design
- Cost effective
- Small carbon footprint
- Environmentally friendly
- High reliability
- Reduced operating costs
