Technical Data Sheet

ADDITROL ABM

A single package additive precisely engineered and blended to meet your green sand moulding requirements

FEATURES

- ✓ Highest quality ingredients
- ✓ Blended for individual applications
- ✓ Simplified material handling and inventory
- ✓ Improved quality control
- ✓ Available raw materials for any green sand casting application

GENERAL:

Additrol provides a uniform and precisely blended single-package sand addition to the muller with a minimum of handling, storage and inventory. Additrol formulations are individually engineered to provide that competitive edge for green sand metal casting facilities, regardless of moulding equipment, production rate, metal type, and casting or configuration. Additrol is a blend of only the highest quality raw materials

APPLICATIONS:

Additrol formulations are custom made to suit the specific requirements of individual foundries for the efficient production of quality castings.

FORMULATION:

Highest quality Wyoming and /or Australian Domestic Bentonite together with high grade coal.

ADDITROL ABM

Volclay Bentonite	60%
Coal	40%

PACKAGING:

Multi-wall paper bags, Bulker Bags and Bulk Tankers
