

ADDITROL®

PRODUCT DESCRIPTION

Additrol® is a single-package additive, precisely engineered and blended to meet your green sand molding requirements.

Additrol® provides a consistent blended single-package addition to the muller with a minimum of handling, storage and inventory. Various blends are individually formulated and manufactured to provide foundries with improved green sand additive control. Additrol formulations can accommodate all green sand metal-casting facilities, regardless of molding equipment, production rate, metal type or casting configuration.

Additrol® is blended with the highest quality raw material at Rayong blending plants conveniently located to ensure adequate supply and on-time delivery.

ADDITROL® FEATURES

- Highest quality ingredients
- Accurately blended for individual applications
- Simplified material handling and inventory
- Single addition at muller minimizes process variables
- Rayong conveniently located blending plants
- Variety of available raw materials to use for any application
