AQUADRAIN 100BD

AQUADRAIN 100BD drainage composite consists solely of a polystyrene core and polypropylene geotextile filter fabric and contains no Volatile Organic Compounds (VOCs). AQUADRAIN has been successfully used to provide positive drainage on thousands of projects worldwide.

MANUFACTURING LOCATION
CETCO certifies that AQUADRAIN 100BD drainage composite is manufactured in Atlanta, GA. If your project falls within a 500-mile radius of this location, the product is considered to be a locally produced material and can help contribute to earning Materials & Resources - Credit 5.0.

RECYCLED CONTENT
CETCO certifies that the core of AQUADRAIN 100BD drainage composite is manufactured with 90% post-consumer material recycled content. The geotextile does not contain pre-consumer or post-consumer material. Please note that this recycled content figures are not absolute. Day to day variations in manufacturing operations will result in minimal variations from the above listed figure. As over 50% of the product is recycled content, AQUADRAIN 100BD can help to contribute to earning Materials & Resources - Credit 4.1 and Credit 4.2.

VOC CONTENT
CETCO certifies that AQUADRAIN 100BD contains 0 g/L Volatile Organic Compounds (VOCs). EQ Credit 4.1 and EQ Credit 4.2 pertain to materials that are to be used in the interior of the building. CETCO waterproofing products are applied onto the exterior of the structure and therefore are not subject to the intent of EQ Credit 4.1 and EQ Credit 4.2. However, CETCO has provided the volatile organic content (VOC) of AQUADRAIN 100BD herein.

CONSTRUCTION WASTE MANAGEMENT
In areas where facilities exist, the following AQUADRAIN 100BD materials are recyclable and can contribute to earning MR Credit 2.1 and MR Credit 2.2:
