

# SAFETY DATA SHEET

# 1. Identification

| 1. Identification               |   |  |  |
|---------------------------------|---|--|--|
| Product identifier              | WATERSTOP-RX® 101T  |  |  |
| Other means of identification   | None.   |  |  |
| Recommended use                 | Not available.  |  |  |
| Recommended restrictions        | Workers (and your customers or users in the case of resale) should be informed of the potential presence of respirable dust and respirable crystalline silica as well as their potential hazards. Appropriate training in the proper use and handling of this material should be provided as required under applicable regulations.   |  |  |

| 2. Hazard identification        |   |  |  |
| Physical hazards                | Not classified.   |  |  |
| Health hazards                  | Carcinogenicity Category 1A   |  |  |
|                                 | Specific target organ toxicity, repeated Category 1<br>exposure   |  |  |
| Environmental hazards           | Not classified.   |  |  |
| Label elements                  |   |  |  |
|                                 |   |  |  |
| Signal word                     | Danger  |  |  |
| Hazard statement                | May cause cancer. Causes damage to organs through prolonged or repeated exposure.   |  |  |
| Precautionary statement         |   |  |  |
| Prevention                      | Keep out of reach of children. Read label before use. Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not breathe dust. Wash thoroughly after handling. Do not eat, drink or smoke when using this product. Wear protective gloves/protective clothing/eye protection/face protection.                 |  |  |
| Response                        | If medical advice is needed, have product container or label at hand. IF exposed or concerned: Get medical advice/attention.  |  |  |
| Storage                         | Store locked up.  |  |  |
| Disposal                        | Dispose of contents/container in accordance with local/regional/national/international regulations.   |  |  |
| Other hazards                   | None known.   |  |  |
| Supplemental information        | 28.16% of the mixture consists of component(s) of unknown acute oral toxicity. 29.16% of the mixture consists of component(s) of unknown acute dermal toxicity. 29.16% of the mixture consists of component(s) of unknown acute hazards to the aquatic environment. 29.16% of the mixture consists of component(s) of unknown long-term hazards to the aquatic environment. |  |  |

# 3. Composition/information on ingredients

#### **Mixtures**

| Chemical name  | Common name and synonyms  | CAS number  | %  |
|--|---|---|--|
| SILICA, CRYSTALLINE, QUAR  | TZ  | 14808-60-7  | 3 - < 5  |
| CARBON BLACK   |   | 1333-86-4   | 1 - < 3  |
| SILICA, CRYSTALLINE,<br>CRISTOBALITE   |   | 14464-46-1  | 1 - < 3  |
| Other components below report  | able levels   |   | 90 - 100   |
| All concentrations are in percent by   | y weight unless ingredient is a gas. Gas concen   | trations are in percent by vol  | ume.   |
| Composition comments   | Occupational Exposure Limits for constituents   | are listed in Section 8.  |  |
| 4. First-aid measures  |   |   |  |
| Inhalation   | Move to fresh air. Call a physician if symptoms   | s develop or persist.   |  |
| Skin contact   | Wash off with soap and water. Get medical att   | ention if irritation develops a   | nd persists.   |
| Eye contact  | Rinse with water. Get medical attention if irrita   | tion develops and persists.   |  |
| Ingestion  | Rinse mouth. Get medical attention if sympton   | ns occur.   |  |
| Most important<br>symptoms/effects, acute and<br>delayed                     | Prolonged exposure may cause chronic effect   | S.  |  |
| Indication of immediate<br>medical attention and special<br>treatment needed | Provide general supportive measures and trea<br>Symptoms may be delayed.  | t symptomatically. Keep vict  | m under observation.   |
| General information  | IF exposed or concerned: Get medical advice/<br>(show the label where possible). Ensure that n<br>involved, and take precautions to protect them  | nedical personnel are aware   |  |
| 5. Fire-fighting measures  |   |   |  |
| Suitable extinguishing media   | Water fog. Foam. Dry chemical powder. Carbo   | on dioxide (CO2).   |  |
| Unsuitable extinguishing<br>media  | Do not use water jet as an extinguisher, as this  | s will spread the fire.   |  |
| Specific hazards arising from the chemical                                   | During fire, gases hazardous to health may be   | formed.   |  |
| Special protective equipment and precautions for firefighters                | Self-contained breathing apparatus and full pre-  | otective clothing must be wo  | rn in case of fire.  |
| Fire fighting<br>equipment/instructions                                      | Use water spray to cool unopened containers.  |   |  |
| Specific methods   | Use standard firefighting procedures and cons   | ider the hazards of other inv   | olved materials.   |
| General fire hazards   | No unusual fire or explosion hazards noted.   |   |  |
| 6. Accidental release meas   | sures   |   |  |
| Personal precautions,<br>protective equipment and<br>emergency procedures    | Keep unnecessary personnel away. Keep peo<br>appropriate protective equipment and clothing<br>authorities should be advised if significant spill<br>see section 8 of the SDS.   | during clean-up. Ensure ade   | equate ventilation. Loca                                     |
| Methods and materials for<br>containment and cleaning up                     | Stop the flow of material, if this is without risk.<br>Put material in suitable, covered, labeled conta<br>SDS.   |   |  |
| Environmental precautions  | Avoid discharge into drains, water courses or o   | onto the ground.  |  |
| 7. Handling and storage  |   |   |  |
| Precautions for safe handling  | Obtain special instructions before use. Do not<br>and understood. Keep formation of airborne du<br>ventilation at places where dust is formed. Do<br>using, do not eat, drink or smoke. Should be h<br>appropriate personal protective equipment. We<br>industrial hygiene practices. | usts to a minimum. Provide a<br>not breathe dust. Avoid prolo<br>andled in closed systems, if | ppropriate exhaust<br>onged exposure. When<br>possible. Wear |
| Conditions for safe storage, including any incompatibilities                 | Store locked up. Store in original tightly closed<br>away from incompatible materials (see Section  |   | each of children. Store                                      |

## 8. Exposure controls/personal protection

#### **Occupational exposure limits**

| US. ACGIH Threshold Limit Values<br>Components           | с<br>Туре                    | Value              | Form                 |

# Canada. Quebec OELs. (Ministry of Labor - Regulation respecting occupational health and safety)

| Components   | Туре | Value      | Form             |
|--|------|------------|------------------|
| CARBON BLACK (CAS<br>1333-86-4)                          | TWA  | 3.5 mg/m3  |                  |
| SILICA, CRYSTALLINE,<br>CRISTOBALITE (CAS<br>14464-46-1) | TWA  | 0.05 mg/m3 | Respirable dust. |

| Canada. Quebec OELs. (Min<br>Components         | istry of Labor - Regulation respecting occu<br>Type   | pational health and sa<br>Value | ifety)<br>Form          |
|---|---|---------------------------------|-------------------------|
| SILICA, CRYSTALLINE,<br>QUARTZ (CAS 14808-60-7) | TWA   | 0.1 mg/m3                       | Respirable dust.        |
| Biological limit values                         | No biological exposure limits noted for the ing   | gredient(s).                    |                         |
| Exposure guidelines                             | Occupational exposure to nuisance dust (total and respirable) and respirable crystalline silica should be monitored and controlled.   |                                 |                         |
| Appropriate engineering controls                | Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. |                                 |                         |
| Individual protection measures,                 | such as personal protective equipment   |                                 |                         |
| Eye/face protection                             | If contact is likely, safety glasses with side shields are recommended.   |                                 |                         |
| Skin protection                                 |   |                                 |                         |
| Hand protection                                 | Wear appropriate chemical resistant gloves.   |                                 |                         |
| Other   | Use of an impervious apron is recommended   |                                 |                         |
| Respiratory protection                          | Use a particulate filter respirator for particulat<br>Exposure Limit.   | e concentrations excee          | eding the Occupational  |
| Thermal hazards                                 | Wear appropriate thermal protective clothing  | , when necessary.               |                         |
| General hygiene<br>considerations               | Observe any medical surveillance requirement<br>measures, such as washing after handling th<br>smoking. Routinely wash work clothing and p  | e material and before e         | ating, drinking, and/or |

In 1997, IARC (the International Agency for Research on Cancer) concluded that crystalline silica inhaled from occupational sources can cause lung cancer in humans. However in making the overall evaluation. IARC noted that "carcinogenicity was not detected in all industrial circumstances studied. Carcinogenicity may be dependent on inherent characteristics of the crystalline silica or on external factors affecting its biological activity or distribution of its polymorphs." (IARC Monographs on the evaluation of the carcinogenic risks of chemicals to humans, Silica, silicates dust and organic fibres, 1997, Vol. 68, IARC, Lyon, France.) In June 2003, SCOEL (the EU Scientific Committee on Occupational Exposure Limits) concluded that the main effect in humans of the inhalation of respirable crystalline silica dust is silicosis. "There is sufficient information to conclude that the relative risk of lung cancer is increased in persons with silicosis (and, apparently, not in employees without silicosis exposed to silica dust in guarries and in the ceramic industry). Therefore, preventing the onset of silicosis will also reduce the cancer risk..." (SCOEL SUM Doc 94-final, June 2003) According to the current state of the art, worker protection against silicosis can be consistently assured by respecting the existing regulatory occupational exposure limits. May cause cancer. Occupational exposure to respirable dust and respirable crystalline silica should be monitored and controlled.

## 13. Disposal considerations

| Disposal instructions                    | Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Dispose of<br>contents/container in accordance with local/regional/national/international regulations.                      |  |
|--|--|--|
| Local disposal regulations               | Dispose in accordance with all applicable regulations.   |  |
| Hazardous waste code                     | The waste code should be assigned in discussion between the user, the producer and the waste disposal company.   |  |
| Waste from residues / unused<br>products | Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions). |  |
| Contaminated packaging                   | Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.       |  |
