

# AKWASEAL® INJECTION GROUTS

## AKWASEAL LV FORMULATION CHANGE & TWO NEW CATALYSTS - CAT-230 AND CAT-240

In our continuing effort to improve our products while maintaining compliance with newly implemented policies from The Environmental Protection Agency (EPA) and Global Harmonization System (GHS), CETCO has updated the AKWASEAL LV and AKWASEAL FLEX product lines. The new policies relate specifically to the labelling, packaging and shipping of finished products.

CETCO has developed new advanced formulas which now exclude the additives subject to the new regulations. The new advanced formulations maintain the characteristics of the current AKWASEAL products while improving some of the products properties. The changes outlined below apply to AKWASEAL LV, AKWASEAL FLEX, and their respective catalysts purchased after April 20th, 2020.

Prior to these changes AKWASEAL LV and AKWASEAL FLEX both utilized the same catalyst. AKWASEAL LV and AKWASEAL FLEX products purchased after April 20th, 2020 will now be sold with their own catalysts which are intended specifically for use with only the AKWASEAL resin they are purchased with.

AKWASEAL LV shipments will now include a 0.95 Liter (1-Quart) can of AKWASEAL CAT-230. AKWASEAL FLEX shipments will now include a 0.95 Liter (1-Quart) can of AKWASEAL CAT-240.

The catalysts sold with AKWASEAL LV and AKWASEAL FLEX are to only be used with their respective AKWASEAL resin and are not to be interchanged. The catalyst, AKWASEAL CATALYST, purchased prior to April 20th, 2020 which may still be in our customers inventory can only be used with AKWASEAL FLEX and not AKWASEAL LV.

In addition to the changes with the catalysts, the AKWASEAL LV resin formulation has been changed while the AKWASEAL FLEX formulation has not been altered. In order to help our customers differentiate the difference between old AKWASEAL LV and the new AKWASEAL LV resin, AKWASEAL LV purchased after April 20th will include a code "20-C43" in the bottom right hand corner of the label (see below).

Questions or concerns related to these changes can be directed to CETCO Technical Services at [tech.services@mineralstech.com](mailto:tech.services@mineralstech.com)
