

CETCO Launches ULTRASEAL AB for Advanced Waterproofing Protection

FOR IMMEDIATE RELEASE

BETHLEHEM, Pa. (June 17, 2019) – CETCO is pleased to announce the next generation of its proven ULTRASEAL® waterproofing system – ULTRASEAL® AB waterproofing membrane.

Incorporating a new pressure-sensitive adhesive layer, the enhanced ULTRASEAL® AB waterproofing membrane bonds tenaciously to concrete to prevent water migration. ULTRASEAL® AB waterproofing membrane bonds once concrete is poured against its membrane surface. Unlike other adhesive-bonding membranes, its Active Polymer Core (APC) waterproofing layer self-seals small punctures and tears commonly caused during construction activities. The product's adhesive layer protects the polymers from moisture during construction, which enables it to be installed in all weather conditions and both hydrostatic and non-hydrostatic conditions.

ULTRASEAL® AB waterproofing membrane is designed primarily for under slab and property line foundation shoring wall construction, including soldier pile and lagging, metal sheet piling, auger cast caisson, shotcrete, and stabilized earth retention walls. It can be used in backfilled conditions as well.

“In addition to improved performance, the new ULTRASEAL® AB waterproofing membrane will provide another important benefit to our customers”, stated Bob Grich, Director of Business Development, CETCO Building Materials. “The fact that there is now one version of the product that can be used for all waterproofing applications simplifies both the ordering and installation processes.”

ULTRASEAL® AB waterproofing membrane carries a 10-year warranty when installed in accordance with CETCO's [HYDROSHIELD™](#) Quality Assurance Program. For more information or to obtain a sample, visit <http://www.cetco.com> or contact cetco@mineralstech.com.

About CETCO®:

A subsidiary of Minerals Technologies Inc., CETCO is a construction technologies company based in Bethlehem, Pennsylvania. Offering solutions for commercial, industrial and infrastructure construction challenges worldwide, CETCO uses its expertise in transforming minerals and polymers into technologies that improve productivity and performance. This includes developing environmental solutions for the containment and remediation of pollutants, including groundwater treatment, solidification and stabilization, and sediment remediation.

About Minerals Technologies Inc.:

Minerals Technologies Inc. (MTI) (NYSE: MTX) is located in 35 countries with 158 production locations and 12 R&D centers. MTI is a resource- and technology-based growth company that develops, produces and markets worldwide a broad range of specialty mineral, mineral-based and synthetic mineral products and related systems and services. MTI serves the paper, foundry, steel, construction, environmental, energy, polymer and consumer products industries. The Company reported sales of \$1.808 billion in 2018.
