DESCRIPTION
DRILL-TERGE is a liquid solution of nonionic surfactants formulated to increase detergency and wetting properties of drilling fluids.

RECOMMENDED USE
Designed to control interfacial tension and inhibit the hydration and dispersion of clay and shale.

CHARACTERISTICS
- Assists in keeping the drill bit clean and prevents bit balling
- Designed to work in fresh or saltwater
- Mixes very easily
- Promotes settling of clays at the reserve pit/tank
- Reduces torque and drag associated with drilling in swelling clays

MIXING AND APPLICATION
Add 2-3 quarts (6-9 liters) of DRILL-TERGE per 100 gallons (per 1.1 m³) of existing bentonite drilling fluid.

PACKAGING
45 lb (20.25 kg) pail, 48 per pallet, or 495 lb (224.5 kg) drum, 4 per pallet. All pallets are plastic-wrapped.
