

QUAD POWER™ POWER-CLAY™

CLAY ANNIHILATOR

DESCRIPTION

POWER-CLAY™ is a concentrated, non-hazardous, proprietary clay inhibitor that can either be used with bentonite fluids or can be added to other QUAD POWER™ polymer drilling products. POWER-CLAY is an ideal additive for HDD bores in reactive clay soils.

RECOMMENDED USE

QUAD POWER polymer drilling products are designed for use in smaller diameter/short-length horizontal bores when use of bentonite is not desired. POWER-CLAY is designed to be added to POWER-BASE™. Using POWER-CLAY will greatly reduce or eliminate clay cuttings from sticking to each other and to the drilling tools. Swelling of the bore will be reduced or eliminated. Rotation and pullback pressures will be significantly reduced.

ADVISORY

QUAD POWER polymer drilling products or any polymer products alone should never replace bentonite based drilling fluids for larger diameter, longer bore shots, or exceptionally challenging and higher risk projects.

CHARACTERISTICS

- Greatly reduces clay rings and bit balling
- Increases returns back to the surface
- Non-hazardous
- Readily dispersible
- Reduces pullback pressures
- Reduces torque
- Will not significantly alter yield point or filtrate

QUAD POWER PRODUCT APPLICATION

NUMBER OF CONTAINERS PER 500 GALLONS FRESHWATER

SOIL CONDITIONS	POWER -BASE	POWER -TERGE	POWER -CLAY	POWER -SAND
UNKNOWN	1	1		
SAND	1			2
SAND & GRAVEL	1	1		3-4
SAND & CLAY	1	1	1	2
CLAY	1	1-2	1	
STICKY CLAY	1-2	2	2	

PACKAGING

~32 ounce containers, 6 containers per case, 48 cases per pallet.
