To Our Customers:

Re: ViCALity® compliance

Specialty Minerals Inc.'s ViCALity® Precipitated Calcium Carbonate (PCC) products are manufactured from limestone quarried on our site in Adams, Massachusetts. The ViCALity® family of products meets the current requirements for both the United States Pharmacopeia (USP) and Food the Chemical Codex (FCC) Monographs for Calcium Carbonate.

There are some characteristics defined in the European Pharmacopeia (EP) that our products do not meet, or that we do not test for.

If you have any additional questions, please feel free to contact me at (413) 662-9968.

Sincerely,

Parvin Golbayani
