ATF SERIES (ADAMS, MA)

Screened Limestone Products

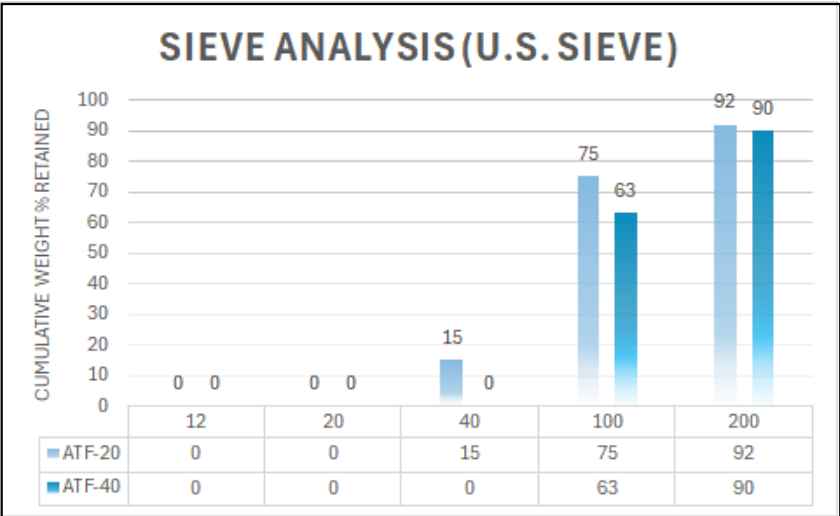

Product Description

Specialty Minerals ATF screened limestone products are of high purity and characterized by controlled brightness, particle size, and density. ATF screened limestone products are used in a variety of applications such as tile and sheet flooring, roofing, and other building products. ATF product top sizes range from 10 to 40 mesh (U.S.).

Consistent quality of ATF screened limestone products is assured by process control on all aspects of their manufacture, from mining the calcite ore to milling and final packaging. All ATF products are manufactured from a high quality deposit of natural calcite located in Adams, MA. All ATF screened limestone products have the same chemical and mineralogical composition.

Typical Physical Properties*		Chemical Composition (Typical)	
Specific Gravity	2.7	Magnesium Carbonate (MgCO ₃)	1%
Dry Brightness (Hunter Y, Rd value)	82	Moisture (%) (% weight loss @ 110° C)	0.2%
Bulk Density (lbs/ft ³) (grams/cc)	90-95 1.44-1.52	Calcium Carbonate (CaCO ₃)	96%

*Values listed are typical, not to be considered as specifications of the product.
