Screened Dolomitic Limestone

Product Description

Specialty Minerals Inc. DF 5025 screened dolomitic limestone is produced at our Canaan, CT plant from a high quality, high brightness dolomite (calcium-magnesium carbonate).

DF 5025 is used in a variety of industrial and agricultural applications, such as fillers in floor tiles, soil treatment, and acid neutralization.

The consistent quality of SMI dolomite products is assured through a wide range of mining and manufacturing process controls including regular chemical and mineralogical composition analysis and precise particle size (PSD) screening, engineered to industry and application requirements.
